

# Human IL-1 alpha/IL-1A Protein

Cat. No. IL1-HE00A

## Description

<b>Source</b>	Recombinant Human IL-1 alpha/IL-1A Protein is expressed from E.coli without tag. It contains Ser113-Ala271.
<b>Accession</b>	NP_000566.3
<b>Molecular Weight</b>	The protein has a predicted MW of 18 kDa same as Bis-Tris PAGE result.
<b>Endotoxin</b>	Less than 0.05 EU per µg by the LAL method.
<b>Purity</b>	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC

## Formulation and Storage

<b>Formulation</b>	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
<b>Reconstitution</b>	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µg/ml is recommended. Dissolve the lyophilized protein in distilled water.
<b>Storage</b>	-20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3 months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

## Background

The interleukin (IL)-1 family of cytokines is currently comprised of 11 members that have pleiotropic functions in inflammation and cancer. IL-1 $\alpha$  and IL-1 $\beta$  were the first members of the IL-1 family to be described, and both signal via the same receptor, IL-1R. Over the last decade, much progress has been made in our understanding of biogenesis of IL-1 $\beta$  and its functions in human diseases.

## Assay Data

### Bis-Tris PAGE

Human IL-1 alpha on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

### SEC-HPLC

The purity of Human IL-1 alpha is greater than 95% as determined by SEC-HPLC.

Assay Data

SPR Data

Human IL-1R1, His Tag captured on CM5 Chip via anti-his antibody can bind Human IL-1 alpha, No tag with an affinity constant of 0.51 nM as determined in SPR assay (Biacore T200).
